

International Academic Cooperation Schedule of BJTU School of Traffic and Transportation in 2025

Dear Professors and Friends,

Thank you for your continuous attention and support to BJTU School of Traffic and Transportation in the fields of scientific research and talent cultivation. In 2025, we are planning the following activities, and we sincerely invite you to participate.

01

Workshop on Smart Rail-backed Multimodal Systems

Time

May 10th, 2025

Place

Beijing

Introduction

The Workshop on Smart Rail-backed Multimodal Systems is set to take place on May 10th, 2025. This workshop serves as an extension of the Education-Research Seminar that will be held in partnership with TU Delft, our esteemed collaborator in the Education Collaborative Programme, from May 7th to 9th, 2025. It aims to bring together prominent researchers from various institutions and foster a dynamic environment for knowledge exchange in the field of traffic and transportation, focusing on intelligence, efficiency and sustainability in multimodal transport systems. During the workshop, each speaker will give a 20-minute keynote speech, presenting and discussing their latest research findings and achievements.

BJTU School of Traffic and Transportation will cover the speakers' international round-trip flights and accommodation during the workshop.

02

Time

October 16th-17th, 2025

Place

Beijing

Topic

Targeting better rail-backed multimodal systems

**The 10th International
Symposium on Railway
Operations Research (ISROR)**

Introduction

ISROR is committed to strengthening cooperation and promoting knowledge sharing in railway operation and management. The 10th ISROR will focus on more key issues and industry trends, including railway transport planning, rail transit design and urban sustainability, intelligent operation, rail infrastructure management and multimodal transport integration. The two-day conference will consist of opening and closing ceremonies, keynote speeches and a technical visit. Each keynote speaker will give a 25-minute speech followed by a 5-minute Q&A session.

BJTU School of Traffic and Transportation will cover the round-trip airfare for keynote speakers, book and pay for their accommodation and meals in Beijing during their attendance at the conference.

WELCOME TO ISROR

03 Golden School

Time

To be determined by the professor according to their own schedule, while also taking into account the semester schedule of BJTU.

Place

Beijing Jiaotong University

Topic

The topic will be determined by the professor, including but not limited to traffic engineering, railway operations and management, transport planning, urban rail transit, road traffic and passenger flow, infrastructure management, logistics and supply chain.

Introduction

Golden School is an overseas academic course programme for Master and PHD students of BJTU School of Traffic and Transportation, which has been held continuously for 12 years. Annually, three to six courses will be scheduled. Each course spans 16 hours and is usually conducted intensively within one week. At the professor's discretion, a break of up to 10 minutes per hour may be arranged. Professors can determine the assessment format according to the course topic. BJTU School of Traffic and Transportation has no specific requirements in this regard. The assessment format can include, but is not limited to, group work, examination, etc. If the professors accept the invitation, BJTU School of Traffic and Transportation will assign a teaching assistant to handle matters such as scheduling the course time, arranging classrooms, managing course registration, compiling grade statistics, tracking attendance, etc.

BJTU School of Traffic and Transportation will cover the round-trip air tickets for lecturers, book and pay for their accommodation in Beijing during the course. Teaching fees will be paid in a lump sum at the end of the course, with a standard amount of RMB 16,000 before tax per course.

2025 BJTU
